(totaling 16 documents)

The Stock Exchange of Thailand (“SET”) has revised the rules of listed companies and disclosure of information of trusts, and property funds and infrastructure funds (collectively referred to as “funds”). The revision of the rules will be effective from July 1, 2026 as follows:

1. Revision to the rules on disclosure of information to provide investors with sufficient information for investment decision-making. The additional disclosure requirements include financial transaction with risk to the financial position and operating performance of the listed companies, the trusts, and the funds, events or indications affecting internal control system of the listed companies, and a list of shareholders of the listed companies upon the significant occurrence.

Furthermore, the revision of the rules is to ensure consistency with the current context and restructure to enhance clarity and ease of understanding.

2. Revision to the rules on Backdoor Listing and Cash Company to comply with the intended purpose of transaction and to further align with international standards

3. Revision to the rules on Caution sign to enable more appropriate supervision of listed companies.

4. Revision to the rules on Free Float to ensure that the companies seeking listing on SET comply with the intended requirements, to enhance clarity, and to reduce the discretionary judgement by SET.

The details of revision to the relevant rules and regulations are outlined in Enclosures 1 and 2. In addition, SET has issued FAQs on Disclosure of Financial Risk Information and Consideration of Backdoor Listing and Cash Company at www.set.or.th under section “Rules and Regulations” “Issuers” and “Simplified Regulations”.

Please be informed accordingly.

Yours sincerely
