Summary of the Amendment of the Stock Exchange of Thailand (SET) Trading Regulations

The Stock Exchange of Thailand ("SET") has implemented the New Trading System to enhance the system to be align with global practice. The new system is developed by trading software vendor which provide trading system to many Exchanges. SET has revised the regulations to suit the current business environment, better align with international practices and support a new trading system. The key trading regulations which have been amended are:

- 1. Opening price / closing price of securities
- 2. Adjusting Ceiling and Floor of securities held by foreigners (-F securities)
- 3. Cancelling odd lot trade of Derivatives Warrant (DW)
- 4. Adjusting order types
- 5. Adding trading suspension sign: P (Pause)
- 6. SET may cancel trading order any time when there is a system failure

Subject	Amended Regulations in the New Trading System	Remarks
1. Opening price /		
closing price of		
securities		
1.1 Opening price /	In the New Trading System, calculation of opening price and closing price (auction price) apply the same principle where	In accordance with the Core
closing price	the system will aggregate all orders during pre-open and pre-close period and match once in one price. The auction	Algorithm in the New Trading
calculation method	price calculation in the new system is as follows:	System.
	1. The price that generates the maximum executable volume (same as old system).	
	2. If there is more than one price as mentioned in 1, the price with minimum unexecuted volume ("Minimum	
	imbalance") is selected. (same as old system).	
	3. If there is more than one price with minimum imbalance as mentioned in 2, the following prices is applied:	
	3.1 If the aggregate buy volume is greater than the aggregate sell volume (Positive Imbalance), the highest price	
	under item 2. is selected. (same as old system).	
	3.2 If the aggregate sell volume is greater than the aggregate buy volume (Negative Imbalance), the lowest price	
	under item 2. is selected. (same as old system).	

Subject	Amended Regulations in the New Trading System	Remarks
	3.3 If the aggregate buy volume is equal to the aggregate sell volume in all price levels, price closest to the last	
	trading price (Last Sale), IPO Price or the lowest price is selected respectively. (The highest price is selected in	
	the old system.)	
	(Cancel the following condition in the New Trading System: If the imbalances are on both buy and sell, select	
	the two prices nearest to the price level where the imbalance changes sign. Between those two prices, the one	
	closest to Last Sale or IPO Price or higher respectively is used as the auction price.	
	(Examples of Opening price / closing price calculation are available in the Appendix)	
1.2 ATO / ATC Order	ATO / ATC ¹ order handling in the New Trading System will be changed slightly from old system. The new system work	In accordance with the Core
handling	as follows:	Algorithm in the New Trading
	• ATO / ATC buy order = the higher price between the following price:	System.
	- Highest bid price + 1 tick	
	- Highest offer price + 1 tick (The old system applies the highest offer price.)	
	• ATO / ATC sell order = the lower price between the following price:	
	- Lowest bid price - 1 tick (The old system uses the lowest bid price.)	
	- Lowest offer price - 1 tick	
1.3 Opening price /	Due to the different handling of ATO / ATC orders in the New Trading System, the opening price / closing price can fall	In accordance with the Core
closing price may	outside ceiling & floor but not exceeding ±1 tick. Investors can avoid this event by sending Limit order instead of ATO /	Algorithm in the New Trading
fall outside the	ATC order (The old system require the price to be within the range not exceeding the ceiling and floor.)	System.
Ceiling & Floor		
price ±1 tick size		
2. Adjusting Ceiling	Ceiling and floor of foreign shares will be adjusted to ±60 percent of reference price for all trading methods as Trade	Adjust Ceiling & Floor to be in
and Floor of	Report method of foreign share's large transaction (with size of at least 1 million shares or THB 3 million (approx. USD	line with securities type.
securities held by	88,547)) is inconsistent with other trading methods.	

¹ At the Open (ATO) / At the Close (ATC) means order to trade at opening price / closing price. If there is unmatched volume, the system will cancel the remaining volume when the market opens / closes and ATO / ATC order will be matched before Limit Order.

Subject	Amended Regulations in the New Trading System	Remarks
foreigners (-F	(In old trading system, ceiling and floor of Trade Report of foreign share's large transaction mentioned above is ±30	
securities)	percent of reference price, while ceiling and floor of Automated Order Matching and Trade Report with less than 1 million	
	shares and THB 3 million are ±60% of reference price.)	
3. Cancelling odd lot	An odd lot, of which transaction size is less than 100 units, will be cancelled for the trading of derivative warrants (DWs)	After launching the New
trade of Derivatives	because the trading value is very low. In addition, when the underlying shares declare benefits such as dividends where	Trading System, investors
Warrant (DW)	DW issuer will pass on such benefits to DW holder by adjusting exercise ratio or exercise price instead of adjusting the	can hold odd lot of DW to
	number of DW units, resulting in no odd lot DW.	exercise the rights at maturity
		date.
4. Adjusting Order	Allow Overnight Order to be kept in SET's trading system. The queue for Overnight Order is based on order entry time at	
types	first place. The allowed order types are:	
4.1 Allow Overnight	1. Good till Cancel (GTC): Orders are valid until cancelled.	To facilitate investors with
Order	2. Good till Date (GTD): Orders are valid until specified date or cancelled.	more order types and
		consistent with order types of
	The additional conditions for Overnight Order are:	Thailand Future Exchange
	• The order will be kept in SET's trading system for 30 calendar days at maximum. (The order entry date is the first	(TFEX).
	date.)	
	Overnight Orders will be cancelled:	
	 If the order price is outside ceiling and floor of each day. 	
	O On The first day when the ex-beneficial sign is posted on the securities or detail of securities is changed	
	(Corporate Action) such as dividend payment (XD), Right to subscribe newly issued shares (XR), change of par	
	(Par Split), change of ticker symbol	
	• Overnight Order for odd lot trade is not permitted.	
	• In case SET imposes a measure to buy securities with advanced fully-deposit cash (or Case Balance account) due	
	to trading supervision measures or where C (Caution) sign is posted etc., members need to supervise the overnight	
	order to comply with such measures.	

Subject	Amended Regulations in the New Trading System	Remarks
4.2 Cancelling of	Cancel of Special Market Order ² in the new trading system.	No such order type in new
Special Market		trading system and in global
Order		practice. Special Market
		Order can be replaced with market order ³
4.3 Improving Iceberg	Improving Iceberg Order ⁴ as follows:	Improve to be align with
Order	 Iceberg Order can be used with Limit Order, Market Order or Market to Limit Order⁵ (in old system, Iceberg Order is allowed with Limit Order) 	international practices
	• No cancellation of iceberg orders when the securities is suspended trading or when iceberg orders are not matched in the same session as order is placed. (in old system, Iceberg Order will be cancelled).	
4.4 Changing the Order	Changing the Order condition's name of Immediate or Cancel (IOC) ⁶ to Fill and Kill (FAK)	Adjust to be in line with
condition's name of IOC to FAK		international practice.
4.5 Additional order	In the New Trading System, investors can combine order type and order condition as follows:	Amended in accordance with
type and order	Pre-open session and Pre-close session	the standard software of the
condition combined	• Limit Order can be placed with Day ⁷ , Fill and Kill (FAK), Good till Date (GTD) and Good till Cancel (GTC)	New Trading System and
	(in the old system, Limit Order must be placed with Day only).	provide investors more
	• ATO / ATC can still be placed the same as in old system.	alternatives.
	Open Session	

² The feature of Special market order is the same as market order except when there is unmatched volume bid or offer, it will be set as bid at last price +1 tick or offer at last price -1 tick respectively.

³ Market Order is an order with no specified price. The system will match with the opposite order at every price level until all specified volume is matched. If there is unmatched volume, the system will immediately cancel such remaining.

⁴ Iceberg Order is an order that aims the system to slice trading volume into smaller portions and publish to the orderbook, once the previous smaller portion is matched, the system will gradually publish the next smaller portion into the system automatically.

⁵ Market to Limit is an order with no specified price to only bid at the lowest offer price or only offer at the highest bid price. If there is unmatched volume, the Unmatched volume (if any) will be converted to a limit order of bid or offer at price equal to the last executed price.

⁶ IOC or FAK is an order that will be matched immediately and if all or some lots are unmatched, the unmatched lots will be immediately cancelled.

⁷ Day condition means an order which is valid in the trading system within the day the trading order is placed.

	Subject	Amended Regulations in the New Trading System	Remarks
		 Limit Order can be placed with Day, FAK, FOK, GTD and GTC (in old system, Limit Order must be placed with Day, FAK and FOK.) Market Order can be placed with FAK and FOK (in old system, Market Order must be placed with FAK). Market to Limit Order can be placed with Day, FAK, FOK, GTD ແລະ GTC. (in old system, Market to Limit Order must be placed with Day). 	
5.	Introduce new suspend trading sign (P: Pause)	Introduce new suspend trading sign P (Pause) due to abnormal trading condition.	Regulations of trading halt (H) and suspension (SP) is still the same.
6.	SET may cancel trading order any time when there is a system failure	 SET may cancel trading orders during any period of system disruption to cope with emergencies or prevent damage to overall trading. The SET guidelines are as follows: In case of system failure which may widely affect the trading and if trading is continued, may damage or be unfair for investors, SET may temporarily suspend trading of any or all securities. When system failure is solved and ready for recommence trading, SET may consider to cancel unmatched orders for any or all securities in the market. In such case, SET will inform the members and investors in advance via communication channels of SET. SET will send details of cancelled orders to the relevant members for their reconciliation apart from normal daily operation data. 	To accommodate emergency case and prevent damages on overall trading and improve the regulations to be align with international practice.

Example 1: Maximum Executable and Minimum Imbalance

	E	Bid	Offe	er			
	Volume	Price	Price	Volume			
	200	ATO	ATO	100			
	100	10.90	10.50	100			
	200	10.80	10.70	100			
	100	10.70	10.90	100			
	Last sale =	= 10.70					
	Price	Bid	Accumulated	Offer	Accumulated	Matched	Imbalance
			Bid		Offer	Vol.	
	11.00	ATO =200	200		400	200	-200
Auction price	10.90	100	300	100	400	300	-100
	10.80	200	500		300	300	200
	10.70	100	600	100	300	300	300
	10.60		600		200	200	400
	10.50		600	100	200	200	400
	10.40		600	ATO = 100	100	100	500
	10.30		600		0	0	600

ATO buy side = the higher price between Highest bid price + 1 tick and Highest offer price + 1 tick = 10.90 + 0.10 = 11.00ATO sell side = the lower price between Lowest bid price - 1 tick and Lowest offer price - 1 tick = 10.50 - 0.10 = 10.40 Example 2: Positive Imbalance, the highest price is selected.

E	Bid	Offer		
Volume	Volume Price		Volume	
100	100 ATO ATO		100	
200	11.00	10.30	100	
5,000	10.70	10.40	100	
500	10.30	10.50	100	
		10.90	100	

	Last sale = 10.70						imbalance
	Price	Bid	Accumulated	Offer	Accumulated	Matched	Imbalance
			Bid		Offer	Vol.	
	11.10	ATO =100	100		500	100	-400
	11.00	200	300		500	300	-200
	10.90		300	100	500	300	-200
	10.80		300		400	300	-100
Auction price	10.70	5000	5,300		400	400	4,900
	10.60		5,300		400	400	4,900
	10.50		5,300	100	400	400	4,900
	10.40		5,300	100	300	300	5,000
	10.30	500	5,800	100	200	200	5,600
	10.20		5,800	ATO = 100	100	100	5,700
	10.10		5,800		0	0	5,800

ATO buy side = the higher price between Highest bid price + 1 tick and Highest offer price + 1 tick = 11.00 + 0.10 = 11.10ATO sell side = the lower price between Lowest bid price - 1 tick and Lowest offer price - 1 tick = 10.30 - 0.10 = 10.20 Example 3: Negative Imbalance, the lowest price is selected.

B	Bid	Offer		
Volume	Price	Price	Volume	
100	ATO	ATO	300	
100	11.00	10.20	100	
100	10.90	10.40	100	
200	10.80	10.60	100	
200	10.50	10.90	100	
200	10.30	11.00	100	

	Last sale =	= 10.70	Negative	imbalance			
	Price	Bid	Accumulated	Offer	Accumulated	Matched	Imbalance
			Bid		Offer	Vol.	
	11.10	ATO =100	100		800	100	-700
	11.00	100	200	100	800	200	-600
	10.90	100	300	100	700	300	-400
	10.80	200	500		600	500	-100
	10.70		500		600	500	-100
Auction price	10.60		500	100	600	500	-100
	10.50	200	700		500	500	200
	10.40		700	100	500	500	200
	10.30	200	900		400	400	500
	10.20		900	100	400	400	500
	10.10		900	ATO = 300	300	300	600

ATO buy side = the higher price between Highest bid price + 1 tick and Highest offer price + 1 tick = 11.00 + 0.10 = 11.10ATO sell side = the lower price between Lowest bid price - 1 tick and Lowest offer price - 1 tick = 10.20 - 0.10 = 10.10 Example 4: Imbalance = 0, the price closest to the last traded price is selected.
