

Guide for Independent Software Vendor (ISV)

The Thai equity and derivatives market are operated on the same trading platform, SET CONNECT, which is developed under cooperation between SET and Nasdaq by utilizing Nasdaq Financial Framework solution (NFF/MME). The Stock Exchange of Thailand (SET) and Thailand Futures Exchange (TFEX) give access to open interfaces for Independent Software Vendors (ISVs) to develop software applications or offer technical access and/or services.

Both domestic and international ISVs are welcomed to become our certified ISV in order to serve the need of investors. ISVs can choose to connect to SET CONNECT via either OUCH/ITCH or FIX 5.0 SP2 protocols. If you are a vendor looking to add SET/TFEX to your portfolio of market solutions, please contact our team to request for the technical specification documents.

For more inquiries, please contact [ISV Access Support](#) (history kept) or mail to ISV_Access_Support@set.or.th
